## Who We Are

Fertilizer is a critical nutrient that crops need for the secure and reliable growth of food in Canada and around the world. The companies that make fertilizers play a critical role in the manufacturing sector and are also major contributors to the economy. The fertilizer industry actively promotes responsible use of its products and supports efforts to maintain environmental stewardship.

Fertilizer Canada represents manufacturers, wholesale and retail distributors of nitrogen, phosphate, potash, and sulphur fertilizers. The association is committed to supporting the fertilizer industry with innovative research and programming, while advocating sustainability, stewardship, safety and security through standards and Codes of Practice.

The fertilizer industry plays an essential role in Canada's economy, contributing to nearly \$24 billion annually and employs 76,000 workers throughout the supply chain. In order to remain globally competitive, we are committed to supporting our industry with innovative research and programming. We take pride in advocating for sustainability, stewardship, safety and security through our industry-leading standards and Codes of Practice. As the foundation of Canada's agri-food sector, we apply innovative solutions that positively impact the environment, the economy, and the social fabrics of Canadian life.

## We're Growing Sustainability®

The fertilizer industry is a leader in sustainability and is an essential building block to a profitable, environmentally and socially-responsible, abundant and healthy food production cycle.

Fertilizer Canada's Sustainability Principles include:

- Basing our decisions and actions on sound science.
- Promoting best practice on-farm nutrient 4R Nutrient Stewardship (Right Source @ Right Rate, Right Time, Right Place).
- Ensuring products are safe, environmentally responsible and effective.
- Standards for the safe, secure and environmentally responsive and responsible production, distribution, handling and transportation of fertilizer.
- Open communication and working in partnership with our stakeholders.
- Encouraging transparency and performance reporting.
- Acting with integrity.
